Willyam Kevin Ramos

Software Developer

Portfolio: https://willyamramos.dev   Email: ramoswillyam1@gmail.com   Github: https://github.com/wramos1

SKILLS

Proficient: JavaScript(ES6+), React.js, Redux.js, HTML, CSS/SASS, REST APIs

Familiar: Typescript, Java, Node.js, MongoDB, GraphQL, TailwindCSS, jQuery, Next.js

Tools: Github, Postman, Figma, Git, Photoshop

PROJECTS

Quoted   https://wramos-quoted.netlify.app

Javascript | React | Firebase | NextJS | TailwindCSS | HTML

- Developed a dynamic and interactive full-stack web app which empowers users to post, explore, and engage with inspiring quotes while prioritizing data security through robust user authentication.
- Successfully integrated Firebase into the app despite being unfamiliar with the technology, showcasing adaptability and quick learning abilities.

Noume   https://willyamramos.dev/noume

React | TailwindCSS | 3rd Party APIs | HTML

- Built a user-friendly web app enabling users to easily search and discover hotels, similar to popular platforms like Hotels.com.
- Implemented a personalized touch by allowing users to save preferred properties using Local Storage for future trip planning.

Weight Plate   https://weight-plate.vercel.app

React | NextJS | GraphQL | Shopify | TailwindCSS | Javascript | HTML | CSS

- Developed a dynamic restaurant website mock-up catering to fitness enthusiasts, leveraging E-Commerce development principles for seamless user experience.
- Integrated GraphQL endpoints and NextJS dynamic routing to establish multiple internal API routes, enabling RESTful implementation connected to the Shopify CMS. This facilitated efficient data retrieval, updates, and cart management for enhanced user interactions.

Super Team   https://willyamramos.dev/super-team

React | Typescript | HTML | CSS | 3rd Party APIs | Javascript

- Created a website for superhero enthusiasts where they can create a team of their favorite heroes/villains and view their power levels with a modern UI/UX design.
- Integrated Randomize Team and Build Team pages with features that allow users to randomize a team or individually input the heroes/villains they wish to put in their team.

WORK EXPERIENCE

Freelance Developer   Jan 2021 - Present

- Increased profits for clients' businesses by developing their web pages with optimized page load speeds and beautifully styled, complex user interfaces.
- Maintained best practices in the industry while developing these websites in regards to app architecture and system design in order to create a clean and readable codebase.
- **Adela Flores (Newborn Care Specialist)**: http://adelafloresncs.com/
- **Tacos El Zorro (Restaurant):** http://tacoselzorro1.com/

EDUCATION

California State University, Northridge | B.S in Computer Science   Expected graduation: 2025

- **Coursework Completed:** Intro to Data Structures & Algorithms, Data Structures & Algorithms, Calculus, Calculus II, Computer Architecture & Assembly
