Willyam Kevin Ramos

Software Engineer

(818)-714-4801 | https://willyamramos.dev | ramoswillyam1@gmail.com | https://github.com/wramos1

EDUCATION

California State University, Northridge   Computer Science
- **Coursework Included:** Intro to Data Structures & Algorithms, Data Structures & Algorithms, Calculus, Calculus II, Computer Architecture & Assembly

SKILLS

Languages: JavaScript(ES6+), TypeScript, HTML, CSS/SASS

Frameworks/Libraries: React.js (Hooks & Context API), Redux, NextJS, Tailwind CSS

Tools: Git, Github, Postman, Figma

PROJECTS

Noume   https://willyamramos.dev/noume
React | TailwindCSS | 3rd Party APIs | HTML
- Built a web app using React.js where users can search for hotel properties and save them for their next trip.
- Experimented with several React Portals to create modals aimed at highlighting the reviews and photo galleries of a hotel to the user.
- Integrated Local Storage and React hooks to allow users to save hotel properties that they would want to revisit when planning a trip.

Weight Plate   https://weight-plate.vercel.app
React | NextJS | GraphQL | Shopify | TailwindCSS | Javascript | HTML | CSS
- Utilized E-Commerce development essentials to create a functional mock-up of a restaurant website that is geared towards people into fitness.
- Successfully combined GraphQL endpoints with NextJS dynamic routing in order to create multiple internal API routes that are connected to the Shopify CMS so as to fetch, update and delete information related to products and a user's cart.

Super Team   https://willyamramos.dev/super-team
React | Typescript | HTML | CSS | 3rd Party APIs | Javascript
- Created a website for superhero enthusiasts where they can create a team of their favorite heroes/villains and view their power levels.
- Integrated Randomize Team and Build Team pages with features that allow users to randomize a team or individually input the heroes/villains they wish to put in their team.

Dad Joke Tier List   https://willyamramos.dev/DadJokeTierList
Javascript | HTML | CSS | 3rd Party APIs
- Developed website from start to finish to showcase fundamental understanding of HTML, CSS, and Vanilla Javascript and for all those who enjoy a good dad joke.
- Created various features such as a joke generator and a "Create Your Own Joke" form that all dealt with manipulating the DOM with Javascript.

WORK EXPERIENCE

Freelance Developer   2021-Present
- Increased profits for clients' businesses by developing their web pages with optimized page load speeds and beautifully styled user interfaces.
- Maintained best practices in the industry while developing these websites in regards to app architecture and system design in order to create a clean and readable codebase.
